Spring

By Jackie Taylor

According to Robin Williams "Spring is nature's way of saying, "Let's party!" Fresh buds bloom, animals awaken, and the island seems to come to life again. Wulkowicz Woods and the woods at the Wildlife Center provide an impressive show of wildflowers each May. These woodland wildflowers develop early and then quickly bloom, a very common event in deciduous forests as the woody plants have not yet formed a canopy and the sun is able to reach the forest floor. This is also a great wildflower display because the bedrock on South Bass Island is dolomite which is rich in calcium and moisture.

Common wildflowers you will be able to see starting in early to mid-May on the island include:

Bloodroot

Herb Robert

Spring Beauty

Dutchman's
Breeches

Appendaged
Waterleaf

Downy
Yellow Violet

As the leaves of the woody plants develop the canopy will begin to shade the wildflowers. The leaves will wither away leaving only the roots, rhizomes, and bulbs for the remainder of the year. So what is considered a woody plant? A woody plant is a tree, shrub, or vine that produces wood as its structural tissue. **Some of the woody plants you will see on the island are:**

Hackberry

Black Walnut

Sugar Maple

Basswood

Other examples of woody plants are Poison Ivy- "leaves of three let them be" and Virginia Creeper, this plant has five leaves but is commonly mistaken as Poison Ivy.

Poison Ivy

Virginia Creeper

These are only a few of the many wildflowers and woody plants that grow at the Wildlife Center, Wulkowicz Woods, and on the island! You can also visit Jane Coates Wildflower Trail and Scheeff East Point Preserve. For a complete wildflower and tree list as well as the preserves to visit on the islands go to our website- lakeerieislandswildlife.com.

Spring Night Skies

By Gene Zajac

The Spring skies present us with a pairing of two planets and a bright star to make an interesting triangle in the sky. The planets are Saturn and Mars and the star is the bright reddish star called Antares in the constellation of Scorpius. A third planet (Jupiter) is present in the constellation of Leo. It will be very high in the sky when it is due South while the other two planets remain low even at their highest when they are due South.

Spring in the Northern Hemisphere begins at 12:31 A.M. EDT on March 20 here on PIB. Jupiter will be 55 degrees high and the nearly full moon will be to the right of Jupiter. The full moon is on March 23rd. Orion will be setting and the Big Dipper will be near the zenith in the Northern Sky. At 12:31 A.M. on March 22nd the moon will be directly below Jupiter! Good photo opportunity!

Using star apps on your electronics devices will help locate the stars, constellations and planets that I mention.

On April First the sunset time is 7:57. Mercury is following the sun and sets at 8:45 so there is a chance to see it as the sky darkens in the East. In the South and Southeast there are the constellations in a clockwise order, Gemini the highest, Auriga, Orion, Canis Major and Canis Minor. These constellation form a winter necklace of stars. Highest in the South in Gemini are Pollux and Castor, next is Capella, Aldebaron in Taurus, Rigel in Orion, Sirius in Canis Major, and Procyon in Canis Minor. Each day they will be setting earlier as the Spring Constellations rise in the East. Orion with its belt and three other bright stars lie within the winter necklace. Looking North you will find Polaris, the North Star, at an altitude of 41 degrees which will not change in altitude! Above the Little Dipper the Big Dipper will continue to be easily seen. It was very low in winter. At midnight the Summer Triangle of stars will begin its path in the sky. It is not until one A.M. that

the triangle of Saturn, Mars and Antares rise.

The April Full Moon is April 22nd. In May it is on the 21st and the June Full Moon is on the 20th. On April 22nd the sun sets at 8:20 P.M. By 9:30 Orion and friends are setting in the SW-W. Leo is high in the Southern sky with Jupiter and the moon in the East with Virgo and the bright star Spica. In the East the star Arcturus and Vega begin their nightly journey in our Spring Sky.

June 20 has the Full Moon and the beginning of Summer at 6:35 PM. The sunset time is 9:09 PM!!! The Eastern sky has the wonder two planet and one star triangle which will be with us late at night in Spring but early evening in summer. This triangle does not climb high in the sky as Jupiter did earlier in the season. This triangular grouping is in Scorpius as I mentioned earlier. Antares is known as the rival of Mars and both will appear reddish! I hope you have a wonderful time being out and seeing these celestial gifts this Spring!

2016 Plant and Garden Information Exchange

Saturday, May 7

Drop off your plants beginning at **9 am** at the **Lake Erie Islands Nature and Wildlife Center** Located on Meechen Road.

Garden Talk: 10am: Raised Beds and Container Gardening.

This is a perfect topic for our little piece of the rock. We all know how little top soil there is and that gardening on the island can be frustrating at times. Join Master Gardener Mary Strayer from Milan, Ohio as she shares her knowledge of many ways to deal with this issue. Mary is a retired social worker and now writes gardening books. She has been a Master Gardener since 2000. She belongs to 3 garden clubs, as well as an herb club. She writes for 2 newspapers and has been featured in Better Homes and Gardens Special Editions. She began lecturing about gardens in 2003 and now gives talks throughout Northern Ohio. Exchange will take place immediately following Mary's talk.

Don't forget to bring some money for the unusual assortment of garden themed raffle items we find each year!

Tickets will be \$1 each or 6 for \$5.

All proceeds will go toward the LEINWC Building Addition Fund.

This event will take place rain or shine, please dress appropriately.

Questions? Call Sandi at 419-366-7919.

[Extra Native Plants will be offered for sale by the Lake Erie Islands Conservancy!](#)

Back To The Wild - An Animal Rehabilitation Clinic in Castalia, Ohio

Will visit Put-in-Bay, on **Wednesday, May 4, 2016.**

She will bring her critters for a show at **3:15 at the Put-in-Bay Town Hall.**

Her visit is sponsored by:

The Put-in-Bay Recreation Committee, The Lake Erie Islands Nature and Wildlife Center, The Lake Erie Islands Conservancy, & Miller Boat Line.

LEINWC's Little Free Library

By Lisa Brohl

The Lake Erie Islands Nature and Wildlife Center will be home to a nature themed Little Free Library this summer! Check out the website www.littlefreelibrary.org for listings around Ohio and the country. Dr. Carmen Trisler has one in her yard and past vice president Valerie Mettler told us all about the little libraries in Marion, Ohio where she now sits on a Library board. We will be hosting a free lending library for Nature books, field guides, and children's books. There are no posted hours-just come and

borrow a book or two. The case is unlocked. Casey Carty is building ours and the location will be registered and marked on the Little Free Library website. Look for advertisements on our Facebook and website for updates on themes of books in the "Library" as the season progresses!

Lets Go Krogering! The LEINWC is part of the **KROGER COMMUNITY REWARDS PROGRAM!**

Be sure to have your Kroger Plus card handy and register your card with the LEINWC

- Enter NPO #-54153 or name of organization
 - select organization from list and click on confirm.
- All of the reward points will go toward the Wildlife Center Building Addition Funding!

Register online at krogercommunityrewards.com

Something's Coming, Something Good! Come & See What it Will Be!

By: Kate Ptak

We are making some changes at the wildlife center. This season we will have monthly themes to help you learn more about the displays inside, and what to focus on outside. Our first theme, which will cover two months from May 1st (posted on scheduled days posted on page 1) through the end of June, will be **Wildflowers**, featuring the beautiful, shy, short-lived spring flowers found on our island. The featured animal will be the **Water Fowl** that you can see on display at the center.

We will have hands on activities ready for you when you visit the center. Actually, below this article we have one activity for you to do and then bring to us at the Nature Center once it opens. The spring wildflowers won't wait for opening day! South Bass Island has wonderful displays of Bloodroot, Herb Robert, Dutchman's Breeches, Spring Beauty,

Appendaged Waterleaf, and Downy Yellow Violet hiding in our woods. On page 1 in this newsletter you will see pictures of these flowers and learn more about them. Your challenge, if you choose to accept it, is to tell us where you spotted them here on the island. We want to build a display at the Nature Center of the wildflower hot spots, so next spring, more people will know where to look for them. You are the explorer, scouting out the best places to find each flower.

Meanwhile, back at the center, we will have marked the waterfowl that we have on display to show which are birds we can see here on or near our shoreline. We will have posters showing other birds to look for here. We'll have activities to sort native birds from the non-native birds. We'll have activities to learn how these birds have certain features that help them survive. What are their favorite foods? How do their beaks help them? What about how their wing shape helps them survive? What about their legs and feet?

Looking forward to July, our theme will be **fish**, and our featured animal will be **fishes of Ohio and Lake Erie**. We will have posters and activities to explore and learn more about the fish that live in our great lake.

In August the theme will be **birds**. Our featured animals will be the **fox and coyote**. We will match the birds with their songs, and look at their beaks to learn what foods they eat and why. We will learn about their wings and how they match the environment they live in. Oh, and there's more. Come and see what else we'll learn about our fine feathered friends. We'll also learn about the fox and coyote using posters and activities to spot the ones we see on the island and compare them with foxes and coyotes from other parts of the country.

Finally, in September our theme will be **Butterflies**, focusing on the Monarchs as they migrate to Mexico. Our featured animal will be **squirrels**. Which Squirrel is found on our island? Are the black ones a different species than the gray? Why don't we have the Eastern Fox Squirrel that is found in other parts of Ohio? What's the story behind that?

Besides our themes and animals of the month we will have scavenger hunts, and mystery features to explore, perhaps matching tails to animals on display. Just looking at the pictured tail, can you name the animal? Do you know where to go in the center to find that animal?

We are also introducing a "Little Library" on our porch. Come 'check out' the books we have for you. See article on page 2 in this newsletter for details. So, don't be shy, come visit us at the Nature Center at least once a month, and see what's coming - It's good!

Now is the time of year when winter begins to turn to spring. Some of the wildflowers are hard to miss. To see others you may have to look a little closer. But if you go looking, you are sure to find wildflowers around the island. Keep a list of the spring wildflowers you see around the island. Write the date and place where you spot each one. Then you can compare this year with years to come.

PHOTOGRAPHING THE SPLENDOR OF THE LAKE ERIE ISLANDS

Now in our 16th year of offering Road Scholar learning adventures, we are pleased to announce a new photography program on the Lake Erie islands. Here are some of the things you will experience:

- Learning under the guidance of two noted professional photographers: Tim Daniel, wildlife and nature photographer for the Ohio Division of Wildlife for the past 18 years; and Nina Harfmann, photographer, writer and naturalist from central Ohio
- Capturing the beauty of nature and sites of historical and cultural significance
- Reviewing use of the “creative triangle,” aperture, ISO and shutter speed
- Learning principles of composition, how to read and assess the quality of light and explore more advanced photographic applications such as HDR (High Dynamic Range) and macro photography
- Developing your personal aesthetic in classroom workshops, on-location instruction and postcamera techniques
- Putting what you learn into practice during photography field trips around our home base, the picturesque resort village of Put-in-Bay on South Bass Island, and nearby Middle Bass Island
- Enjoying 5 breakfasts, 5 dinners and 4 lunches and lodging at one of three charming Put-in-Bay B&Bs, all rooms with a private bath

2016 Program Dates:

May 15-20 Sept 25-30

Program price per person:

Double \$949 Single \$1104

Program: 21772LQV

2016 Road Scholar Programs:

Lake Erie: Birding the Islands and Shores #12641 May 1-6 & May 8-13

Photographing the Splendor of the Lake Erie Islands #21772 May 15-20 & Sep 25-30

The Spirit of the Lake Erie Islands: The Drama, The Beauty, The Science #1804 Sep 11-16 & Sep 18-23

For more information and to register, call Road Scholar toll free at (877) 426-8056 Monday thru Friday, 9 a.m. to 6 p.m. ET, or register online at www.road scholar.org

ROAD SCHOLAR
Adventures in Lifelong Learning

2016 WILD Tuesday Schedule

The purpose is to educate visitors on Ohio’s native wildlife by providing an up-close and often hands-on interactive experience. 2015 summer we averaged 100 visitors each week!

DATE	SPEAKER	TOPIC
June 14	Crawford County Park	Salamanders
June 21	Perry's Victory and International Peace Memorial	Invasive Species
June 28	Kristin Stanford	Ssslitherin' Sssnakes
July 5	Gene Zajac	Sun
July 12	TBA	
July 19	Monarch Watch	Majestic Monarchs
July 26	TBA	
August 2	Sandusky County Park District	Bats
August 9	Ohio State University Stone Lab	Something's Fishy
August 16	Cleveland Museum of Natural History	Dragonflies
